(54) COMMUNICATION TERMINAL EQUIPMENT
WITH ELECTRONIC MAIL FUNCTION AND
RECORDING MEDIUM

(57) Abstract:

PROBLEM TO BE SOLVED: To provide the communication terminal equipment with electronic mail function in which a mail not desiring reception is not received and a mail box is not overflowed by mails whose reception is rejected.

SOLUTION: A main control section 1 receives registration of identification information such as a mail address to identify a mail sender whose reception is to be rejected to a table in a RAM 7, analyzes the mail reached to a mail box, extracts sender identification information based on the header or the main text. When the identification information is coincident with identification information stored in the table of the RAM 7, the mail is not received and deleted from the mail box. Furthermore, a mail with contents denoting rejection of the mail is returned to the mail sender.
